(SQL Server) I need to add a new column to a table with the count of a value in another column So I have the following table Users (ID [PK] INT, Firstname [nvarchar] 50, Lastname [nvarchar] 50) I need to add a new column with all the values in 'Firstname' but now and then empty. I need the count of the rows which have Firstname and lastname filled. So the table will be as follows Users (ID [PK] INT, Firstname [nvarchar] 50, Lastname [nvarchar] 50, CountFirstname [int]) Is it possible to do this with SQL Server 2000? (I have to add this column). A: What you're looking for is called conditional aggregation - if you're not doing something like that frequently I'd recommend just rewriting your query to get the results you're looking for.
