If you have a Mac, you can find a few neat keyboard shortcuts in the app. For starters, you can command-click on a URL or hyperlink, in order to open it on Chrome. Also, there's a "Show the Menu Bar" shortcut as well as a "Full Screen" one that toggles the full-screen mode, among other things. All keyboard shortcuts are listed at the bottom of the Settings menu. WHAT YOU'LL NEED: A MAC MACON login

Best Pixel 3 phones: the latest models The latest version of Google's mobile operating system, Android Oreo, is here to prove that the Pixel 3 is one of the best Android phones you can buy today. The latest iteration of the Pixel, unveiled by Google on October 4, has a larger 5.5-inch screen, a squeezable sides, and a dramatically new design that Google claims is made out of "New Zealand Pure Advantage Stone". The Pixel 3 is not only an impressive phone, but it's the flagship Google Pixel product of 2018. Google's first Pixel phone was the 2016 Pixel, and it was a great phone in its own right. But the Pixel 3 promises to be Google's flagship for the year 2018. At this point, you've likely heard about all the new features of the Pixel 3, but here are some of the more notable changes, according to the official product page.

1. Improved camera quality The rear camera gets a big upgrade with the latest Pixel 3. Google has vastly improved the phone's photos, improving both its colors and white balance, and also adding a new Night Sight feature that automatically improves the photos after capturing them in the dark. The updated rear camera, of course, gets an LED flash as well. Google has also made some changes to the front-facing camera on the Pixel 3, including an AI-powered night mode, a new portrait mode, a new feature that automatically fixes faces and expressions, and a feature called "smile to capture," which automatically makes you appear happier for the camera.

2. More intuitive settings The settings menu has gotten an upgrade, with the addition of a "Do Not Disturb" option. If you turn on DND, you get more options, like so-called silent hours, where only calls and messages are allowed in. You can also set a time to switch the DND mode on and off (you can also set the toggle to happen as soon
