Portable WinDirStat

This application is designed for users to clean up their hard disk space. Files and folders are automatically sorted according to their types and sizes. You can clean up the Explorer window, the Desktop and Windows directory. For each file or folder, the user can view the disk usage properties, including the size, date and time of last modification, file attributes (read, write, executable, acl etc.) With a right click in the list, you can delete or copy selected paths to the clipboard, open Explorer at that location, view properties, delete or rename the item with Explorer or Command Line, and start Explorer or Command Line at that location.

What's New In Portable WinDirStat?

Get to know what's happening with your hard drive space usage. Desktop-based or run from removable device, you can easily analyze disk usage. Save and print the main directory paths. File and folder attributes. Icon and color codes. Extension of files with biggest files. Highlight the big files with icon and size change. Delete files to save space. With a few simple clicks, you can also quickly access the software in the portable mode and analyze the disk usage of your external hard drive. Once you have run the application, you can select the drive on which you would like to analyze its contents, and it takes only

System Requirements:

Mac OS X 10.6 or later 5GB disk space (approx. 200MB for downloads) 256MB video RAM DVD drive or HD Video capable of recording to DVD Internet connection A copy of the game is available from the iDOOM website DOOM for Linux has a slightly lower profile than it's Mac and Windows brothers (no pun intended), but it's not the least bit less awesome. I could wax poetic about the love and passion that went into this project, but
