## What's New In?

The XT2XMLWorker component converts XML files into PDF documents. It supports the processing of XML fragments, but also whole XML documents. XML worker differs from an HTML parser in that it does not check the documents for the validity of the tags, making it suitable for all XML formats. The XML Worker can parse large documents, as it is not limited by the size of the internal Java heap. It is limited in that it can only generate PDF files, it cannot render to the screen.
