Features: High-quality audio/video components Simple controls for radio/cassette/CD/MP3 units 6 Aux inputs (3 inputs from 2x10" speakers) SAT input (for Satellite Radio) 2x10" speaker outputs Built-in CD player USB port 3-position volume control and left and right equalizer Description: Soundsport Inc has released their new 12 GB USB Flash Memory Drive (TD-USM12G). The Flash Memory Drive has a SATA interface and comes in three colors: white, black and red. The memory drive is ideal for use in Windows or Mac computers. Features: 12 GB capacity SATA interface Description: Note: This article will guide you through the software setup process of the Asus All-in-One T9150N. Before you start, make sure you have connected your Asus to the computer using a USB cable. If you have never connected your All-in-One before, we have written an easy guide for you here. Step 2. Connect the USB to your computer The first step is connecting the USB. Make sure that the cable is connected to the correct device. To do this, you need to know the number of the device. There are four major USB devices. Devices 1 through 3 are the data ports, and device 4 is the power port. Device 4 is always the power port. The other USB ports are for connecting additional devices. To find the number, look on the back of the unit. The USB cable number is printed on it. It is printed on the back of the unit, on the inside of the flap on the side of the unit. Step 3. Install the drivers The drivers are the software that is needed to work with the USB device. The installation process can be different from manufacturer to manufacturer, so make sure you read the instructions that come with the product. On the page, you can download the drivers for Windows XP, Windows Vista or Windows 7. After
