## What's New In AutoCAD?

The new Markup Assist feature makes it easy to quickly add and modify dimensions, text styles, symbols, and other visual elements to drawings with the click of a mouse. Join Mike Morelli, Martin Pulecio and Mark Kowalkowski from Autodesk for a live webinar on Monday, January 29 at 3pm ET to learn about new features for Drafting and Technical Design in AutoCAD 2023. AutoCAD technology has come a long way since AutoCAD 2002. But, with AutoCAD 2023, Autodesk is advancing AutoCAD technology to a new level, offering users more power, flexibility, and features to help them work more productively. Punctuation and pluralization in right-to-left languages: Get automatic left-to-right and right-to-left punctuation and pluralization in English, Arabic, French, German, Italian, Portuguese, and Spanish. You can also automatically insert right-to-left punctuation in Persian, Russian, and Arabic languages. New text styles for headlines, subheads, and pull quotes: The new Headline text style can be used to draw attention to what's important in your drawings. With the new Headline text style, you can create headlines for sections of text that includes figures and dimensions, subheadings, pull quotes, or any other non-bold text. You can also use the Bold text style to add a more impactful look to text that you want to stand out. You can then apply the Bold text style to any text, both bold and regular, at any size and with any font. New text styles for leading indicators and special character indicators: You can now use the new Leading indicator text style and the new Special character indicator text style to create text that aligns with the leading indicators of a bar graph or radar chart. You can create dynamic text that spans multiple columns or rows in a table, spreadsheet, or presentation. You can also use new text styles for checks, to mark a point that has been checked off in a checklist. And you can use the new Special character indicator text style to indicate that a variable is out of range. More characters and symbols: With new text styles for Arabic characters and Unicode, you can express the more than 2 million characters and symbols in Unicode. AutoCAD can now automatically access
