Shouldn't the \_2\_ sign be used instead of it? A: This is an annotation. This is how you use it: @MyAnnotation("Hello World!") class MyClass {... } It is used to add metadata (information about an object) to it. The method named annotation is a simple list of fields or values, separated by commas or semicolons. Note that annotations are case sensitive, so @MyAnnotation(...) and @myAnnotation(...) are two different annotations. For a list of all available annotations, see
