Written by A Washington Post article said, "The last few weeks have been a rollercoaster for the beleaguered social-networking giant Facebook, with the company's long-anticipated stock offering in jeopardy because of an SEC investigation into possible insider trading." I believe that the main reason that Facebook's stock has declined since its IPO is because of a few very simple things: 1) Facebook is not profitable, and 2) the stock is overvalued. I'm sure that when I give a very vague answer to that question, most people think, "Well, that is what you use it for," and in a way it is true, I use Facebook for those reasons. But some people may think, "Well, I like what you said." "I'm glad you used Facebook for that." This is something that people like to do. Instead of just saying, "Well, it's what I use it for," they use their Facebook account as an opportunity to say, "Hey, I like what you said." So
