"Elden Ring," developed by the Snowfox Games, will be released for PlayStation 4 in Japan on December 3, 2017. Elden Ring is a free-to-play fantasy action role-playing game. By living and fighting, you can build, train, and combine a variety of characters, powers, and weapons to become an unstoppable force in the Lands Between. This new fantasy world was born from the dreams and myths of the Elves. It existed long ago when the Elves were in the ancient times. Elves, Dwarves, Giants, and other mythic creatures originally lived in the Lands Between, and battles continuously engulfed the lands. The sky and the sea, the sun, and the moon were not fixed in the sky, and disaster and persecution were continuously encountered in the Lands Between. However, the Elves did not know the disastrous situation. With the rise of sentient technology such as the Aether's Heart and the Gold Statue, as well as magic, the Elves believed that the danger was finally over. They were held back by their skepticism. As time passed, the humans learned the Aether's Heart, and they saw the light. Once the Humans attained too much power, they collided with a chance that acquired knowledge of the Aether's Heart. Although many perished, they managed to build amazing civilizations, and they were thought of as the most powerful race. The world that was once called the Lands Between was reconstructed by the elves. They had not even realized the Existence of the Lands Between, and they deeply believed that the danger of the Gold Statue was also over. They were also astonished by this living, persistent world. These forgotten times were illuminated when the Elden Ring suddenly rose. Users who found the Elden Ring were possessed by a power that they had not known of; they became powerful and chose their world. The Elves were just like this, and for this reason, the Elves lost the Gold Statue. The Elves could not even acknowledge their existence. The Elves, Dwarves, Giants, and other mythic creatures that had lived in the Lands Between lost the purpose of living and fighting. However, the Elves continued to live, and this was now considered strange. It was a magical land created by the creatures of the past, and the Elves was shocked. The Elves decided to have an eye on the situation and sent followers to the lands. Then, they recognized that there was another living world

"A concise adventure game that is easy to play and fun to experience. Fun for people to whom hardcore RPGs are still too difficult." [PG] Matt Kim [PG] JRPG Mag [PG] Neil Slezak [PG] Destructoid "This game boasts one of the most beautiful rpg interfaces I've ever used." [9/10] Annapurna [9/10] KEY [9/10] Game Heise. "The relatively simple interface will not get in the way of the gameplay, because the functions of the game are divided into few units. For instance, the unit of conversation can be used to communicate with others, as well as talk to the NPC. The user interface is simple enough and easy to understand, thus making the game more playable for a beginner. It should be noted that the size of the game is relatively large, so be prepared to spend some time on your gameplay." [7/10] JRPG Expo [9/10] Gameism [9/10] Nando Sanchez "The game utilizes a 16:9 aspect ratio, which won't affect your viewing angle." Content related issues Hi all, We were wondering if you guys could please help us regarding the "Banned Item" and "Item Identifier" issues. These issues happened on PC but we dont know if they also happen on the PS Vita version. We dont know why this happened either. Item identifier is item id that will be added to an item and the banned items are items that are involved with an item identifier. Banned Items are examples that cant be used or registered. Banned item: Penguin Bar - 1 Worm Rod - 2 Barrette - 3 So we kinda got this message when a piece of equipment got banned or has a failed identifier: This item can't be registered. You can't use it anymore. This is a sign that the item has a failure identifier. If the identifier fails the item was banned. Solved: A few of you might have already found an answer as we dont know either. But we can tell you that this fixed the issue In the Ban Function: The identifier is checked a few times before it is done. That's why its possible that the identifier already failed before. If the identifier fails it just doesnt register it anymore. We also found that the issue in-game disappears when either we begin the game or we exit the game without saving. **Francis de Dacosta Francis de Dacosta (15 January 1906-23 January 1984) was an English composer and conductor. Dacosta was born in Brooklands in Surrey in 1906 to Anglo-Indian parents; his sister was the ballet dancer Violette Gregory. He was educated at Notting Hill School and studied in Paris with Vincent d'Indy, where he was befriended by Saint-Saëns. Returning to England, he worked with Sir Henry Wood at the Royal Academy of Music for a while, and then became conductor of the London Symphony Orchestra; he also conducted at the Proms. He then returned to Paris, becoming director of the Paris Conservatoire in 1955. He worked in Paris until his death. His most famous composition is the cantata The Prince of this World (op. 78; 1939), written in a grandiose style influenced by the music of Stravinsky. It was composed while Dacosta was studying at the Conservatoire de Paris with d'Indy, who was also guest conductor at the Proms that year. The cantata contains settings of the chorale and arias from Johann Sebastian Bach's cantata Ach Gott, du Frommestes Sohn, BWV 41.
