1. Titan was discovered by a Russian astronomer The first person to observe Titan was a Russian astronomer called Prokof'ev, who found it around 1905. Though he could not know it at the time, Prokof'ev had discovered the last of the 8 recognized moons of Saturn. He estimated that Saturn's system had nine moons, but Cassini found only seven -- Titan, the other 5 moons were discovered later.
2. Titan's tungsten-rich composition has led to Titan sounding like a basketball Titan gets its dark color from tungsten, one of the most common elements in the universe, found all over. Tungsten is in a class of elements known as heavy metals. Unlike helium, the gas with similar chemical properties of the noble gas, the other heavy metals -- like tin, cadmium, lead, and mercury --

usually stay on Earth. But on Titan, they stick around. 3. Titan is the only moon in the Solar System with clouds Titan was the first, and so far only, moon to have clouds made of liquid. Most forms of clouds in the Solar System are made from the mineral salts, frozen water, or ice. Titan's

FIFA is the official videogame of the world's biggest club football competition, the UEFA Champions League™. Experience all the emotions and atmosphere of the world's elite soccer tournament like never before. Play one-on-one with the biggest players in the world. You decide who plays for their country and becomes your most prized possession. FIFA was created in 1993 by a team of football experts, from concept to gameplay, working with the world's greatest players. FIFA continues to push the boundaries of videogames, updating the engine used to power the game five times, most recently in 2012. FIFA simulates the complex physics-based interactions between players on the pitch and, for the first time, captures both their motion on the field and their movement through the air, resulting in unmatched player control. In 2013, the FIFA franchise celebrates its 20th anniversary with FIFA 14, the first ever

FIFA developed for next generation consoles. Showcasing new gameplay modes, fresh presentation and music, the game still delivers the best football experience in video games. Trusted by tens of millions of fans worldwide, FIFA is, and will always be the official videogame of football. FIFA's unique gameplay innovations Powered by Football™. FIFA's unique gameplay innovations are the foundation of the franchise, the development of which began in 1993. For the last 16 years, the key pillars of FIFA's gameplay have remained the same, but with each passing year FIFA's gameplay has pushed the boundaries of video game. FIFA was the first videogame to feature multiple camera views, making it a true football experience: Players would often look in different directions, yet be able to see the ball in the same way. FIFA 2 introduced the AI system that would go on to revolutionize games in general. AI players now think for themselves, making each game a new challenge. They combine and swap

players' skills, tactics and abilities, making matches far more unpredictable and exciting. FIFA 12 was the first videogame to feature an all new formation, 3-4-3, which has now become one of the most popular and iconic in all of football. Most recently, the FIFA franchise reached new heights of player innovation with three balls: Players would control how they rolled in order to make key passes, or protect the ball with passes to make them last a bit longer. Players could also manipulate passes by
