But the city's immense collection of memories and artifacts and artistic treasures are right under our feet. Now, for the first time ever, Chicago Underground explores the city's underground world, featuring articles on the diverse world of systems and caves that lie beneath our feet, as well as the architectural past and present that has left its mark in the form of tunnels, sewers, trams, and metro systems. As the web's premier portal for underground architecture, Chicago Underground presents an awe-inspiring collection of images and text providing a unique glimpse into this hidden world. The articles explore system architecture and its role in the city's political, social, and economic development, as well as the industrial past. "See Chicago from above" meets "See Chicago from below" in Chicago Underground's unique collection. Chicago Underground is the exclusive platform for Chicago's underground architecture. It explores the city's past and present underground, with art, history, and stories. Watch as long-forgotten systems make their way into existence above ground, and give in-depth insight into what these spaces hold in their cavernous depths. Land War is a party game you can actually play at a party! Teach your friends, mom, grandpa, or anyone else to play in minutes and invite everyone in on the big screen with 8 player local multiplayer! Simple controls - choose between moving up, down, left, or right and that's all there is to it! Every land war player starts as a humble square in a sea of unclaimed land. But as you move, you capture the squares around you, growing at an exponential rate! Watch out as you encounter your friend's square armies - only the clever players will survive. Clashing with enemies result in stalemate, but players are vulnerable when they turn away! Features: ~10 minute matches, so it's easy to swap players in and out as the night goes on! Over 30 maps and 4 game mode settings. 8 gamepads are supported including 8 xBox controllers simultaneously. Includes support for any controller you might plug in. xInput and all other APIs supported. 2 players can play on a keyboard with WASD and the arrow keys in case you don't have enough controllers lying around! 2 difficulties of Bots to play against! Support for up to 8 players with 8 controllers! Compatibility with Windows, Linux, Mac and SteamOS. Windows version - release version 1.0. Steam - available at Windows - Linux - Mac - A: For the record, I can confirm that Land War does indeed work in Ubuntu through Steam (version 13.04 on 64bit). After selecting the game from the list on the left and selecting the first game from the list, try to right click the desktop and select "Launch Game" (it might need to be highlighted first). If the game is not listed, I think that's because you're waiting for the game to be approved and listed for install. Try to do a quick search for "Land War" (without quotes) in your Steam client and you should see it available to install. It works
