Original review from 3 years ago for ELDEN RING: Welcome to Elden Ring. A fantasy action RPG game developed and published by Aeria Games, it uses a unique online system where players will be able to connect to each other, and also find other players' strategies to play against. It's also a great RPG game with a variety of interesting characters and also a good story. Elden Ring is a fantasy action RPG game that is set in the Lands Between, which is the area between the World of Adventure and the World of Restoration. The dark and mysterious appearance of the lands is made the more appealing because it is a variation from the usual fantasy settings. Unfortunately, it may be rather confusing for the new players because most of them will probably not see the various gameplay features. In fact, it's best to play the game before jumping into Elden Ring. You can check out some reviews to get a rough idea about the game. Elden Ring is set up in a traditional RPG format, where the story takes place in different acts that has a nice overview. It keeps the main story line simple, and also answers the questions that the players may have regarding the background. However, unlike typical fantasy RPG games, Elden Ring features magic that can be used by the player, or maybe more aptly, activated by a character. In order for a character to use magic, he will need to increase his special points that are earned through leveling up. Some special features will also require a character to increase the skill rating, which will raise the character's efficiency in fighting against enemies. By default, you can use health potions when your health is low, which automatically restores your health points to full. The main characters will also be provided with other items such as armor and weapons, and other equipment like shields. Combat plays an important part in the gameplay. Combat is done in real time, and you can also target different parts of an enemy's body to perform different attacks. It's easy to select an opponent if he is moving towards you, but also a bit more difficult if the opponent is waiting in a corner. Different weapons will have different attributes, and you can also use an item
