## SMS Viewer

The program has a very plain interface, oriented towards functionality rather than good looks. The practical aspect is thus well represented inside the main window of this application, from where you can get to the main commands with just one or two mouse clicks. The first thing to do when deploying SMS Viewer is to set the communication port that will be used for retrieving messages. The easiest way to do so is pick the one that includes the name of your connected device. A nice feature of this software solution is the presentation mode that enables you to display the sent and received messages onto a big screen, which can be erased, if necessary, with a single click. Related to this ability, there is an automatic filtering function that will prevent foul language from being exhibited. For this particular purpose, there is a text file included in the package, called `Obscene.txt`, in which you can add all the words that when present inside a message will have their letters masked by symbols. In order to customize the looks of SMS Viewer, you have at your disposal some font and color tweaking tools. More precisely, you will be able to pick the administrator's font type and size, as well as the text and background colors. All in all, this application tries to offer users an interesting set of features, but, unfortunately, it is still troubled by many glitches as it crashes all of a sudden when simple operations are attempted. "These concerns have been raised, for good reason," Mr Paul told reporters in Washington. "If they hold up the issue, it would be fantastic. They would be trying to end filibusters and are trying to end the process of the super committee. That's just not right." The bartering needed to form a bipartisan "supercommittee" of top lawmakers at Congress's disposal to slash about \$1.2 trillion in future spending hit a snag earlier in the day when a Republican senator threatened to object to a vital procedural vote on the measure. The US capital was unusually chilly this morning and the normally hoarding Texans were buying all the ice they could - a clear indication the White House's demand for a tax rise was shaking hearts among the nation's most conservative inhabitants. "I hope it's true," said the owner of an ice cream shop in the Lake Travis region. "We're cutting our business way down right now because it's an election year, and people are just not spending right now because they're watching this issue very closely."

Another important aspect that SMS Viewer has is the possibility of displaying messages sent by the connected mobile to the same application itself.
