Darko, a young single father, has been contacted by a social service worker named Sarah who claims that her brother died while investigating a series of murders at a local children's home back in New York. She believes her brother is investigating the same case and has travelled to your city on her own, because Sarah has no place to go. She only requests that you help her, because no one else wants to know about the case, and the investigator her brother had hired, died in the line of duty. What she doesn't know is that the case you're investigating is more than meets the eye, and the bodies you find are mutilated to such a degree that they're no longer human. Encephalitis with mesial temporal sclerosis and amnesia after administration of a combination of vitamin B6 and magnesium: a case report. We report a 45-year-old woman who developed encephalitis after administration of a combination of vitamin B6 and magnesium. She developed a high fever, headache and nausea 4 days after administration of a large dose of vitamin B6 and magnesium for the treatment of a urinary tract infection. Although the fever subsided, she was left with an amnesic state without any other neurological deficits. MRI showed high signal intensity in the bilateral medial temporal lobes on DWI and FLAIR images. SPECT revealed hypoperfusion in the bilateral medial temporal lobes on anterior-to-posterior gradient. A diagnosis of encephalitis with mesial temporal sclerosis and amnesia was made. Although the present findings are unique, the etiology of this condition is obscure. Several cases of encephalitis with mesial temporal sclerosis and amnesia have been reported, but not involving a combination of vitamin B6 and magnesium. Theoretically, vitamin B6 and magnesium may enhance the intracellular accumulation of K(+) in neurons, which would make the brain more susceptible to the effects of aminergic neurotoxins. Blade Runner: 2049 Released, January 6, 2018 Synopsis:
After the events in the mid-'60s, Rick Deckard (Ryan Gosling) is still LAPD Officer Rick Deckard, despite being six years older. With the help of Hannah (Diane Denmore), he hunts down three Replicants that escaped the lab (Brion James, Mackenzie Davis, Ana de Armas). The trailers got me excited. I really like the Blade Runner look and feel of the original but I've grown up and this one actually does look good. It's like a lot of art form's I love in one. It's got an almost pure Hitchcock feel to it and for once that's actually a very good thing. So I had high hopes for this one and to be fair, it's good. I'm not going to go into detail because I really don't want to spoil it so if you want to find out more, check out the links below. If you watch the above trailer, there will be spoilers for those of you that want to know. What did you think of the film? Would you recommend it?//
