This is a relatively short game, but the gameplay is very interesting and fun. You can play it on your mobile phone and tablets. In the fourth part of the series we come closer and closer to my imaginary friend. I mean where do I come from? It's so scary that every time I see

something that reminds me I have a very bad feeling, even though it's just my imagination. I saw the great fish tail of this phantom and I wanted to throw myself into this lake. And I was trying to reach it. I thought it was a treasure chest or a big box. Once in the middle of the water was this mass. I was so far away from it. My lungs in my chest could not find some air. Then a dark cloud exploded and swallowed me from my back. Suddenly I felt so dizzy. I jumped. I could not understand what was going on. The next thing I saw it was day. My best friend and I were sitting together eating pumpkin seeds. I could not even recall how we have found it or we were in that place. I was hungry and I was thinking about what we should do. I needed something to eat and we have no money. I knew that we should be very wary. We should not leave our place. I felt my body sweating. It was a windy day. I was sitting outside. I put my hand over my face. I was so scared. We became the ghost hunter. We have been looking for some ghosts and we came to this hospital. I saw something very scary. There was a huge amount of smoke coming out from it. I heard something. It was like a noise. Something, something terrible. It was coming my way.

What's new in Scary Hospital Horror Game:

- Grave Grave is an indie horror-slasher game developed by Finnish team. The main character is a young girl who begins the game stuck in a hospital after being abducted by the doctor who accidentally killed her parents. The game is a cartoony-style point & click survival horror game where you explore the hospital in order to escape and try to survive. Grave was originally released on Steam and GOG.com as a DRM-free game, but the developers recently updated the version distributed on GOG.com to Steam edition. For their next title, the developer is working on a new surreal horror game that seems to have the same gameplay as the one described here. Game story You play as a little girl, kidnapped by the grave of her parents. The girl wanders around the corridors, looking for a way to escape. And that's exactly what you need to do in order to survive. But you have to be careful, because the doctor who "succumbed" you to this fate in the past, seems to be following you, looking to finish what he started. And the only thing standing in his way are corpses, night has only begun... or has it? Gameplay and story Grave follows a similar structure to other point & click survival horror games: Start in character creation screen where you choose the main character's appearance; After loading the game, the player explores a dark and eerie hospital, which houses psychopaths and monsters of various shapes and sizes, looking for a way to escape; If you don't find the means to escape, try to follow clues scattered around the hall; If the game presents you another clue you follow it in order to find the next secret passage. The game has two difficulty levels, Casual and Hardcore, and you can choose between them at any time. The developers have chosen to include unique features in their game: A flashlight that always keeps you covered; Warping allowing you to instantly move to the exit; A map which will explain the location of the current and previous area; Corpse puzzles, which employ the game's special mechanics in order to resolve them; Curses, unique game objects which can interact with you. The goal of the developers is to make the player completely immersed into the world they created. The action taken during exploration is almost friction
