It's time to speak out for your right to repair Dear Minnesotans, We have a chance to guarantee our right to repair electronic equipment—like smartphones, computers, and other essential instruments. This is a once-in-a-generation chance to protect local repair jobs—the corner mom-and-pop repair shops that keep getting squeezed out by manufacturers. The technological switch to digital products means new availability, but it also means CAN-SPAM enforcement, schemes to control what we watch and use internet for, and new rights for customers over commercial purchases. The local repair movement gives people back control over their money and their conversations and deserves support. Tell us your story Are you an engineer who started fixing things because you wanted to? Because you saw the potential for improving your community? Because you were lucky enough to learn about 3D printing and you wanted to create something useful? NuTechs needs YOUR help. This is your chance to get the education, practice experience, and technical support in repairing the real world—so you can join the rising tide of local repair. The technicians and engineers at NuTechs need to repair physical goods. If you can repair or create with your hands, please join us. The fine print In plain English: You can help us to fund local repair jobs, and help the cause by: Educating and recruiting people to join the movement Providing direct and affordable access to the tools, professional support, and fun parts you need for local repair Ensuring all of the above are possible for everyone We need people with all kinds of skills, all up and down the learning curve. What can you do to help? Learn by doing—check out NuTechs apps and curricula, and follow what we're up to. Join the NuTechs Facebook group. Make and repair. Start with something simple, build up expertise, and then start repairing really cool things. Start with recycling, repair or repurpose. Work with other people on projects. Start small and work together. Network, share ideas, and get to know your neighbors. We're NuTechs. We're in the business of making things
