The Franz Kafka Videogame is a simple yet intriguing storybook puzzle. Much of the appeal comes from the simple yet well written characters and the intriguing setting. The game moves between different real-time periods of the story as one progresses. Much like VVVVVV, the game actually uses no spoken words but instead lets the player create their own storyline with the environment and actions around them. The storybook puzzles are similar to VVVVVV, involving such things as reading a newspaper article, listening to a song, or using other physical objects to decipher a key on a map or write a sentence. The puzzles start off as simple as requiring you to flip a switch to turn a wall off and on, but become quite sophisticated as you progress. Although not every puzzle is as enjoyable as some of the VVVVVV puzzles, the journey is always worth the effort as the puzzles are cleverly crafted. The game also has a very unique visual style. When solving puzzles the player can look at the map, watch the room slowly transform to fit their needs, or even read a newspaper article as they progress. This makes the puzzles really unique and gives them a sort of fluid feel. The concept has the potential to get repetitive, but thankfully does not. I would recommend this game to fans of the puzzle genre. I give The Franz Kafka Videogame a 9 out of 10.

**Braid-based puzzle game in a very interesting package.**

The Franz Kafka Videogame: In a small hotel, a woman has a dinner date with a man she only knows as Franz. The date is interrupted when a small toy man, dressed as a toy Franz, threatens the woman and a larger toy Franz with a knife. As the chase and the chase continue, the man and woman become increasingly intrigued with each other and the mysterious events surrounding them.

The Franz Kafka Videogame, is a brilliant puzzle adventure that really lends itself well to the pen and paper puzzle genre. The intriguing storybook puzzles are a smart take on the form and are well crafted. The story unfolds in a series of chapters that start with a short introduction that sets the stage for the first chapter. The game's presentation is actually extremely simplistic yet effective and beautifully crafted. When the story is progressing in real time, it is moved forward through chapter menus, starting with the first chapter and finishing with the last chapter in the game. Chapters have titles such as "Last Chapter",
