VocabLift is the all in one educational software package for learning and teaching purposes. VocabLift is a professional learning management system designed for teaching and self-learning. VocabLift supports both keyboard and memorizer input methods. VocabLift is a dictionary software package that is based on the LIFT b7e8fdf5c8

"VocabLift takes your existing dictionary and generates flashcards that can be printed, hand-copied and put in the gamepad of your tablet, smartphone or even a hard copy. You can create a gamepad for any Android tablet as well as a USB keyboard for connecting to a computer. All of the flashcards are able to be saved as mp3 files. VocabLift supports AVR dictionary (.lft), AED dictionary (.cdr), and Mendeley and Verseny dictionary (.dz) (not all dictionaries support all formats)." The term VocabLift seems to be used to refer to other similar programs, so it would be best to think of this application as a tool for creating flashcard decks. VocabLift is an Android application and not available for iOS devices. VocabLift recognizes two basic types of dictionaries: 1. LIFT dictionaries, also referred to as LIFT (Language Instruction and Learning Tool) files, and 2. The Mendeley dictionary format (.dz) for use with Mendeley. Mendeley supports LIFT dictionaries (.lft), AED dictionary (.cdr) and Verseny dictionary (.dz). LIFT dictionaries are a relatively new development and aren't as well supported as other formats. But, as they do support more languages and more formats, VocabLift claims they will be widely used. VocabLift has five game modes (but the game uses flash cards to really test you). The five are: 1. Learn Any Word 2. Find the Correct Word 3. Count Paragraphs 4. Test Your Knowledge 5. Practice Test In Learn Any Word mode, VocabLift will pick the first word that the user inputs into the app. After the correct word is selected, the user is required to select the options 'y' for 'yes' or 'n' for 'no'. This is where the flashcards start to improve your vocab. The better your word recognition skills, the better of a start you will make at learning a new word. Find the Correct Word mode is where VocabLift will guess the word that the user inputs. This is like playing a guessing game. Count Paragraphs mode is similar to Learn Any Word, it will require the user to select the various

VocabLift is a word learning application that turns a set of compiled dictionary project files into a number of testing flashcards with audio clips. It can be useful for both school children, and adults in general. The flashcard decks are simple to create and can be very effective in teaching the user. If you would like to learn about other programs that can be used for the dictionary project files, check out LIFT Dictionary. How to download and use VocabLift: Download.vocablift.com: VocabLift for Mac, VocabLift for Windows Vista/7/8: VocabLift to Mac: VocabLift for Mac 2: VocabLift for Mac version 3: VocabLift for Mac version 4: VocabLift for Windows: VocabLift Version 5: VocabLift for Windows Vista/7/8: VocabLift for Windows Mac OS X Open edition: Download.vocablift.com: VocabLift for Mac, VocabLift for Windows Vista/7/8: VocabLift to Mac: VocabLift for Mac 2: VocabLift for Mac version 3: VocabLift for Mac version 4: VocabLift for Windows: VocabLift Version 5: VocabLift for Windows Vista/7/8: VocabLift for Windows Mac OS X Open edition: VocabLift Software VocabLift for Windows Features: 1.Word learning flashcards for the computer. 2.Word learning flashcards for the computer is more useful and faster than traditional flashcards. 3.Excellent
