Like _most_ Microsoft Office programs, Photoshop can install on Windows-based PCs. However, you need to buy a license in order to use it. A Photoshop knowledge base is available on the Web at ``www.photoshop.com/support``. Of course, you don't have to pay a fee to Photoshop; just download it for free. You can download new versions at no charge. You also get access to a very long user community via Adobe's Photoshop Community, shown in Figure 7-10. This community is a great resource for finding Photoshop or Photoshop-related information. Photoshop is a program that comes in both full and Lite versions. The full version is fairly complex and designed to be used by graphic designers, whereas the Lite version is designed for people who are more interested in basic digital editing for general purposes and to display photos, such as creating slide shows. If you're a beginner, you might not need the full version. A new version of Photoshop, Photoshop CS5, was announced in February 2011. FIGURE 7-10: The Photoshop Community is where you'll find a wealth of support, tutorials, and information.

Thursday, November 21, 2017 The US corporation known as Jeep recalls more than 360,000 SUVs for issues that occurred years ago. It's the latest in a string of recalls the company has had to announce, and it comes after the famed Jeep Wrangler was recalled for its faulty doors, which can come loose in a crash. Over the summer, Jeep recalled nearly 50,000 of the sport utility vehicles after it found five instances in which the doors could open while the vehicles were moving. The National Highway Traffic Safety Administration (NHTSA) said in the notice posted on its website that the Jeep Grand Cherokee and Jeep Wrangler are among the vehicles recalled for issues related to door latches. The NHTSA said on Monday it is issuing two separate recalls of vehicles for a defect affecting seat belts and airbags. The defect could affect 1997-2007 model year vehicles equipped with the B pillar of the center structure as well as floor-mounted belts and position-sensitive seat belts. A replacement part is being offered, and dealers will repair the seat belts and position-sensitive seat belts free of charge. The second recall affects 2001-2003 models of the Grand Cherokee, Liberty, Wrangler, and Wrangler Unlimited and 2004-2007 models of the Cherokee. The NHTSA said the assembly line on vehicles not equipped with optional air bags may have been improperly fixed. The agency is conducting a

safety recall to fix the problem. Both programs began on Nov. 9 and will be completed by the end of the year. The news comes two years after the company was forced to recall nearly 150,000 of its models following a separate issue. The company recalled nearly 100,000 vehicles after it found seats that failed to lock in place could collapse when driving at highway speeds. F-Pace Facelift 2017 “It is the safest vehicle I have ever driven. In every way, it is more efficient,” Miles told Ars Technica at the car’s unveiling at the 2016 Paris auto show. Faced with stiff competition from premium luxury brands, the German company said it was going to reinvent the F-Pace, with the help of different talents than it has employed in the past. “They have unique people who are extremely talented, with a totally different approach and a completely different vision of this product that goes far beyond competition,” Miles told reporters. Effect of Leavening Agent on Stomach Gland Cell Proliferation In Vitro. The effect of five kinds of leavening agents (lactate ester, diacetate, monacetate, methysulfate, and monosulfate) on the proliferation of stomach gland cells in vitro was assessed, and three of the five kinds had the ability to promote cell growth. The results suggest that the unique ability of those leavening agents
