**Note: I'm sorry to all the people who were waiting for this. For one reason or another it has taken me until now to make it. I have also had to take a break from programming for the past few days. I am very sorry to all the people who used to play these types of games and are looking forward to this game. I don't mean to disappoint so please bear with me. But I have now released the game to my friends who have been playing the original version over the past few months. I will upload the game to Facebook, linkedgamemania and illmaiquick. The game is compatible with almost all emulators and gameplay is as close to the original like I could get with few limitations. I have also added new more features such as secret levels(different areas), secret hidden areas(instead of secret) lots of extra enemies and boss stages. The bosses also have secret special abilities.For how to use with gamepad,Dpad or keys see notes below. I have recently been playing the original version which I think is a great game and therefore want to offer my version but with the limitations I mentioned above. I am very glad with the results so far and they were unexpected (for me). UPDATE: I am not going to put up any more temporary progress graphics or updates with that as it can only be seen for a short period of time. But I will continue to update the game with gameplay footage and keep playing it. There is still a lot of work to be done to make the game as good as the original but with the help of the community by playing it and telling me what you would like to see implemented. I hope you all enjoy this new version as much as my past releases and would be great to work on more games like this if you are interested. Please read the below "To Emulator" section to find out how to make the game work with your favorite emulator. All features working in some emulators will work in others. Here are some features that are still missing: hardware controller support (only dpad supported on my version at the moment) only xbox controller support Achievements Pregnant and childroid boss and enemies. Dynamic music update with more music being composed. Upgradeable boss, enemies and special abilities and items. More End-of-level bosses. more powerups**

#### What's new in THE TEAR:

the time travel foreshadowing of Bust a Move... You are Samus Aran, the prime specimen chosen by your future self to become the genetic weapon that would one day save the world! Take control of Metroid's ultimate heroine, equipped with plasma bolts, glow power, and the versatile Morph Ball. Defeat hundreds of enemies, including bosses, each with their own breathtaking attacks. Find powerful hidden weapons and power-ups, including a new ability to Blast Rush! Everyone has their own preferred method of attacks and ways of beating each scenario, but you're never short on weapons and you have the Morph Ball too. After each mission, upgrade your Samus with more energy and new abilities. Over 100 amazing levels in all, including Mira, Nacton, Armadillo, Catacombs, Space World, and a number of special weapon-filled levels! If you liked any of the classic games, you'll love Metroid Prime. If you've never played a Metroid before, you'll fall in love with it. And if you already have those 2... it doesn't get any better than this. Every Wednesday, from now on, and until I get bored of it, I'll be posting Metroid Prime Articles to the PC version. (seems to come up short of the N64 version... it's probably just because of Quake III which I was playing) First post will be with my review of the PC port of MP2, as the review will include some sort of preview/analysis of what's going on in MP3 and MP4. Can't have a Metroid Portal without a little proper spin on one of the many great FPS titles in the genre. Anti-City - The most unique aspect of the game, (and what set it apart from other "Metroid" games), is that you are no longer an outside threat to the planet's might, but an invading force from a distant, advanced civilization known only as the "Anti-City." While you're on the surface, you must fight anything (even you) who is obviously out to stop you from completing your most important task of saving the planet by exterminating its main population of sentient life. There's a massive advantage for you here, however, as the planet's factory goes out of its way to help you out, not surprisingly by equipping you with a spaceship to take you to the locked Sector Zero, a vast area of space where
