* **Photoshop elements:** Photoshop has several versions that give you some control over the canvas without having to buy the full version. It's better for those who don't need to make professional images, but want to use a simple program with some interesting features. It costs less, but like a starter version of Photoshop, the version is available only as a boxed set. * **Adobe Photoshop Lightroom:** This product is a great all-purpose digital photo editing application, even if you never buy the full version of Photoshop. It's been refined over the years to work seamlessly with Photoshop. It offers tools to both adjust and create images. ## Using the Workspaces The modern version of Photoshop is organized into its own workspace. For example, the image-editing tools are all found in the Image Editing section of the workspace. These tools include editing the color, contrast, layers, channels, curves, masks, selections, and so on. You also have a toolbox, dozens of options for many image effects, and the like. In this section, I take you through the different workspaces, how to use them, and how to customize them.

Tag: Long Island Another day, another hotel! Today we're visiting the massive, brightly lit Hyatt Regency in Grand Central Station, Manhattan. I'm interested in its proximity to the train station, the nearby subway and the various elevated trains. I keep thinking of Great Wall, Jiankou, and the long, graceful alleys of New... Today we visit the other side of the globe, the snowy slopes of Switzerland. The train ride from the Stuttgart Hauptbahnhof felt especially bizarre after my last ride in Germany, with the German tourists occupying their seats for the entire duration of the trip. No, I understand the language, I would... Today we go to Frankfurt. My first visit to Germany is on the Swiss border. This city gave me a distinct feeling of culture. I have never been to a city with so many numerous and large cinemas. They are all in the center of the city. I have never been to a... We arrived at the Stuttgart Hauptbahnhof last night around 8:30pm. With the Nuremberg and Freiburg trains already departed, there weren't many people left in the terminal. Except for those few people with the A-crowd and the smoking man. It is a huge difference compared to our Cologne Hauptbahnhof. We had... Cologne would be the only city we would explore outside of Germany, so if you have never been to Germany, you still have a chance to see this city. It has been a long and hard journey, so it would be best to take the train. There is no direct... We're outside of Paris for our first time. The airport was full of Parisians with their large luggage, as if the planes were aircraft carriers. It's not even summer yet and this was already a harsh winter for the population of Paris. We decided to go to our first hotel and ...

Q: How to use Multiply function in lambda expression on Linq Left Outer Join with Left Join? I am confused on how I can use the Multiply function in lambda expression on Linq Left Outer Join with Left Join. How can I write this query in linq lambda expression? `DataContext.Table1s .LeftOuterJoin(dataContext.Table2s, table1 => table1.attribute1, table2 => table2.attribute1, (table1, table2) => new { table1.attribute1, table1.attribute2, product = (table1.attribute1 * table2.attribute1) }) .Select(r => new { ... })` A: The problem with your query is that you are using the Query() extension method, which only does one-to-many. If you are retrieving a set of records, you want to use the Enumerable.Select() extension method, like so: `DataContext.Table1s .LeftOuterJoin(dataContext.Table2s, table1 => table1.attribute1, table2 => table2.attribute1,`
