
Oracle Business Intelligence Publisher

Oracle Business Intelligence Publisher Free Download X64 Latest

Oracle Business Intelligence Publisher Crack Free Download (BI Publisher) is a document creation application for Oracle BI 11g. It is designed to enable creation and delivery of reports and documents that mimic actual business requirements and processes. It allows you to easily publish reports from virtually any data source and structure them to emphasize current business needs in order to guide you, your stakeholders and others to the future. A BI Publisher document can be viewed or printed in a browser or desktop application using a dynamic PDF driver. BI Publisher compresses the report and sends it to the browser or client application. To create a new report with BI Publisher, you can either create a report design or use a document wizard. You then use the BI Publisher Web Service API to publish the report to the server. The BI Publisher Web Service API can be used to write the HTML or PDF content of a document. It also allows you to setup and configure BI Publisher document parameters, authoring options, and so forth. BI Publisher is based on the Apache POI library. It is relatively stable. It does not support the more advanced features found in the Java PDF Library. At the time of release of the Oracle BI 11g, it is in Private Beta. There is no Production ready version. Several people from Oracle have gotten their hands on a BI Publisher release and are using it in their day to day work. They indicate that it is stable. I have not been able to get a BI Publisher document to render properly or to send an email. They have, however, been able to use the BI Publisher Web Service API to develop document templates to automate processes in a near real-time environment.

III. Getting Started with Oracle Business Intelligence Publisher

1. Downloading Oracle BI Publisher:

There are three downloads of Oracle Business Intelligence Publisher.

BI Publisher Web Service API: includes Java APIs, examples, and documentation for using the API with Java servlets, Java servlets, and the Apache POI library.

What's New In Oracle Business Intelligence Publisher?

Oracle Business Intelligence Publisher (formerly BI Publisher) is a tool for Oracle BI Server. This product is a web-based tool that enables business users to create and publish documents containing business intelligence (BI) information or reference the information in other documents. It is designed to significantly reduce the time and cost of the creation and distribution of BI reports. BI Publisher works with a wide range of report management and BI solutions from Oracle's Business Intelligence suite, including: Oracle Business Intelligence and Oracle Business Intelligence for Web. Oracle Business Intelligence Publisher allows users to publish information from a variety of data sources, ranging from relational databases to data warehouses, to web services, and to a web browser for end-user consumption of BI reports. BI Publisher also supports the creation and maintenance of offline or "HTML"-based reference documents which can be shared and made available to end users. These offline documents can contain any combination of BI information, references, or XSLT-based transformations to enable other BI Publisher-based tools to process them. This product supports the creation of user-defined user properties to adjust the appearance of BI Publisher reports. User properties can be assigned to any BI Publisher object, including reports, web parts, charts, and datasets, so end users can modify the appearance of reports and charts when BI Publisher runs. Oracle BI Publisher Online Help: Click here to return to the Online Help This product does not support the following: Oracle Business Intelligence Publisher Concepts: BI Publisher includes a set of object-oriented concepts that provide a common way to deal with reports, charts, and other objects and their properties. Use the following for online help: BI Publisher Concepts: You can refer to the following information to learn more about BI Publisher object-oriented concepts. Oracle Business Intelligence Publisher Version Guide, Security Guide, and User Guide. BI Publisher Concepts Reference: You can return to the Online Help by selecting the BI Publisher Concepts tab. The BI Publisher Concepts tab contains information about BI
