Several studies have documented that patients with major depression and/or anxiety disorders are less likely to use selective serotonin reuptake inhibitors (SSRIs) than their peers without these disorders. This meta-analysis of 49 published studies evaluated the extent to which people with major depression and/or anxiety disorders are less likely to use SSRIs in comparison with the general population. The analyses revealed that adults with major depression and/or anxiety disorders were less likely to use SSRIs, compared with their peers without these disorders. The magnitude of this difference was large in all analyses (SMD = -0.71, 95% CI: -0.90, -0.52), and was significant in all analyses, except for patients with anxiety disorder versus people in the general population. Our results suggest that clinicians should be more aware of the lower likelihood of adults with depression and/or anxiety disorders to use SSRIs.Dystopian Exploitation! After death, the arts is not necessarily a world of comfort. The focus is always on the "living". If we view the arts as a work of art, only then are we able to truly contemplate the issues of life and death. There is a reason the arts, a universal language of compassion, is dying in this country, if only because we have become more and more alienated from each other. To help us understand what has happened, let us consider for a moment a healthy and vibrant work of art, and how it can help us to come to terms with a post-modern world. Young Adult The late 60s and 70s was a period of transition in our society. The hippies had gone, the flower children had begun to wear out their welcome, and the great middle class war had begun. There was a national tension, particularly in the northeastern portion of our country, where the 70s brought further revelations about the concept of the American Dream. It has been a long time since the music industry seemed to be at the forefront of this new movement, but unfortunately for the industry, it was just before a digital revolution began
