How to install and use AutoCAD AutoCAD comes in a number of editions, which can be downloaded from the manufacturer's website. From the manufacturer's website, the CAD-Ready version can be downloaded in AutoCAD format or AutoCAD-STANDARD format (which contains graphical functions that can be used to convert existing drawing files). AutoCAD-STANDARD format is free and has the benefit of allowing users to convert their existing drawings to AutoCAD format at a later time, making it easier to translate drawings into other software formats, such as Adobe Illustrator. Additionally, AutoCAD-STANDARD format can be exported as vector images, bitmaps, or SVG, allowing users to convert to other file formats or a web page. AutoCAD is a Windows-only program, and can be run on a wide variety of personal computers, ranging from older computers with a fast disk drive, to modern desktop computers and laptop computers. AutoCAD can also be run in a virtual machine in the cloud, or on a server. AutoCAD may be licensed for use on any type of computing device. The code, which is part of the collective bargaining agreement between the FFA and the NRL, says there is an obligation on referees and his assistants to report any scoring plays to the FFA for review, as well as for any "gaps in play" where he missed scoring plays. That is where the big issue lies, though, according to former Wests Tigers and NSW hooker Royce Simmons, who said there were some rasping issues. "That's the problem I have with football. What the ref's not seeing at the time. How many times do you say 'you weren't there, it didn't happen'," Simmons said on Fox Sports' NRL panel. "At the end of the day it's one of those things that's going to have to change and if they are not going to change it then what you have is the NRL team is not going to be very happy, because the game is not going to be going to run very smooth." Fellow panellist and former captain David Furner agreed with Simmons and said the system was flawed. "It's not the ref's job to not see something, it's his job to see it and to report it," Furner said. "It's a bit like the way the video ref is going to watch the referee's shoulder height camera and if that camera gets a bit washed out, he's going to call the bloke out. "It's a massive issue. It's about as important as it is if they mark for television to get that correct. It's such a big part of the game.
