Furthermore, FIFA Ultimate Team Seasons will feature a new way to reward players for their accomplishments in the Real Winner and Serie A modes. How does the gameplay on the pitch change? FIFA features a number of gameplay innovations, including new AI behaviours and new player options. AI New improvements to the EA SPORTS AI engine make for a more intelligent opponent in all game modes, as well as the addition of new behavioural patterns, tactics, and strategies, which will make matches increasingly unpredictable and require more tactical strategy from players. How will the new AI work? Just like in real life, players will perform certain actions during matches that may make them more or less likely to score a goal. Furthermore, the AI will pick up new tactics and develop new strategies based on how they are performed in the previous game. The AI is also more proactive: it will make more use of its attacking teammates and will not let attacking players get isolated from each other. New Tactics Tactics in FIFA have always played an important role, but the new season brings with it a number of new tactics, which teams can use to manipulate situations and steal victories. bc9d6d6daa
