The bull's owners say she wasn't injured, and that their dog was not the aggressor. A bull is mowing down a four-year-old girl on a farm in Norway. According to a report from The Local, the bull had been rampaging around the farm, attacking animals and people and damaging equipment. When the man responsible for the dog was making rounds, he saw a calf lying on the ground and thought it had been injured. While it was indeed badly injured, it wasn't the bull that had done it. The bull had picked up the injured calf and begun carrying it around, bumping into cows and people. When the man opened the gate to the fence surrounding the farm, the bull began running towards him, and the man used the gate as a shield. But when the bull turned its attention to the girl, it slammed her against the gate. She landed on her butt and, according to the farmer, was uninjured. According to the report, the bull didn't stop, and continued to charge the girl for two minutes until her owner was able to chase him away. The man told The Local that the dog was not aggressive and that it had become aggressive because it had been chained outside. "We're glad there was no serious injury," he said. "It's not the first time that has happened. We think he's become aggressive because he's been chained outside since a puppy." ca3bfb1094
