Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Roblox Screenshot: Description: Is a platform that allow its players create their own games. It is a game creation platform, so that is possible and its use with its own virtual currency, "Robux." The platform opens a new world to all with this concept, allowing children as well as adults create content for all ages. With the launch of the game platform in 2006, the project has grown exponentially, increasing from about 20 developers in 2006 to more than 100,000 developers that launch more than 1 million different types of games per month. Already one of the most popular games on the platform, "Roblox" is a free-to-play online game in which players can design games or play games created by other players. The game is played through a web browser, but the functions are similar to those of a computer or mobile app. Roblox Screenshot: Roblox Description: Is a platform that allow its players create their own games.
