
The Dynamic Library Rld.dll Failed To Load Fifa Manager 13 11

A: I would suggest do install any DirectX patches offered by your operating system before installing any program that requires DirectX to work. In your case it's .NET framework. The .NET Framework 4 is known to have issues with game installation. I suggest that you install the latest version from Microsoft of .NET Framework 4 before installing any game. Q: Rails: Sass partial not being included I have a helper called 'center' which is included in both layouts. In the layout, I use it like so: And it works fine. I also have the same helper in the show.html.sass which renders fine. The only problem is that the helper doesn't do anything when I use it in a partial. For example, I have a navbar partial where the li elements each get a margin-right of some static number. If I want to use the center helper in the show.html.sass file, it doesn't work, but if I place it in the layout, it works fine. I've also tried using a helper in the view and calling render :partial in the helper and that didn't work either. Is this a bug in Rails 3.1 or is it a misconfiguration? Here are all the files: layout: Hack'Em 6d1f23a050
