## IT9910 Grabber Device (HD) Drivers For Windows 7 64-37

i couldn't play any games on my computer, i didn't know that i had a directx update that i needed. i was only able to run solitaire when i purchased windows 7. here's a link for the directx update drivers (you can go to microsoft.com and search for directx): [directx end user..](#) i use microsoft windows 7 home premium 64 bit. i wanted to add money to my account and when i tried to go to purchase more money it was telling me to install windows 7 home premium 64 bit, the same with windows 7 professional 64 bit and windows 7 ultimate 64 bit. by the way those are my windows 7 home premium 64 bit edition. windows 7 ultimate 64 bit \$12.95. i must say i am disappointed with windows 7 ultimate 64 bit. if you have windows 7 home premium edition.. i know that the drivers version should be the same and they worked in windows vista ultimate. here's a link to the directx update drivers. [microsoft corp. windows 7 service pack 1 - directx version: 10.1.](#) use the link to download windows 7 service pack 1. directx 10.. i decided to try the few drivers listed below with 10.0.15063.1000 so that i could do a clean install. the default install on windows 10 was of hololens device host software which i had run out of space. when installing them the driver manager told me drivers for windows 7 were available, but i already had the latest drivers installed. the driver manager did not install a secondary version and when i tried restarting, windows again told me there were no other versions available. i decided to continue with the latest version of windows 10 drivers. after installing, there was an issue with the download setup which told me there was an unsigned driver. the driver was updated and i did not want to sign the driver again so i decided to install them and take a chance with that. the install went without an issue and since then the device is able to capture video and sound files.
