

Depending on the camera video format, the MAGIX Video to MPEG Converter can convert the source video into MPEG, VCD, SVCD, DVD, Digital8 or AVCHD video formats (depending on your selected settings). To make better use of memory capacity on your PC, the MAGIX Video to MPEG Converter can process videos from different sources at the same time and has an automatic or manual option to choose conversion settings. The software offers a simple user interface and offers a choice of output formats, and includes an audio and subtitle output option. The program features a fast conversion speed of up to 15 FPS (frames per second) and can save media files in AVI, MP4, WMV and MPEG formats. Video editing options include trimming, or removing and replacing intervals in your videos, using the additional trim features. The program even lets you add, merge or delete multiple media files or chunks of audio tracks. The MAGIX Video to MPEG Converter also has a DVD preview function that lets you simulate or burn DVD video discs.
