Today in Make Some Noise, I want to show you how to make em all flicker at once! The power of After Effects in action! This is a very simple way to create a really nice effect. And lets face it- in a crowded marketplace like video editors, many viewers still like to watch stuff flicker. Ever since the introduction of the Live Animate library, it has been a top feature of Final Cut Pro X, as it allows more flexibility in playing with editing easier and faster. It is a powerful tool that makes your editing process easier and faster. But what if you dont have the Live Animate library and dont want to download and install the full version of the application? How do you get this in Final Cut Pro X? This is where Dark Energy comes in. This tutorial shows how to get Dark Energy for free and to use it in Final Cut Pro X! I am going to tell you what you need to know in order to create a cleaner look on your images, although I will try to focus on color space, colors, and toning. For this, I will use the Gaussian Blur in After Effects and Photoshop. I will start with a really bad example and work my way to an amazing one, and I will explain how to do each step, in the process. I will use different examples for each step, so you know how to do it and can try it out for yourself. This will help you learn the different ways in which the creation of an effect is done in After Effects and Photoshop, and therefore, will give you a better understanding of the overall editing process. All you need is an Adobe After Effects project file, Adobe Illustrator files to color them or create them, and an idea of what you want to accomplish. After Effects and Illustrator both have the same complexity. Finding an easy way to layer and layer the effects together can be hard.
