optimisation of refurbishment work of building for the construction of all weather passenger terminal at virupapuram chennai, a research report by k. ramakrishna and k. r. murthy, published by the institution of engineers (india), chennai, in 2012, isbn 978-81-7320-023-0. virtualization is all the rage now-a-days. as the computer business had become saturated, and the need for operating systems became less, the desire for virtualization arose. the focus was originally on the desktop, the server market, and the global delivery of computing resources. thus the concept of virtualization and cloud computing has emerged. this book introduces the concept of operations research in studying problems in non-technical areas like human resources, finance, and management. objective: identify and develop operational research models from the verbal description of the real system. understand the mathematical tools that are needed to solve optimization problems. use mathematical software to solve the proposed models. develop a report that describes the model and the solving technique, analyze the results and propose recommendations in a language understandable to the decision-making processes in management engineering.. 1. basics of operations research, 2. linear programming, 3. graphical method, 4. simplex method, 5. artificial variables technique, 6. duality in linear programming, 7. revised simplex method, 8. transportation problem, 9. transshipment and assignment problems, 10. goal programming, 11. integer programming problems, 12. markov processes and markov chains, 13. dynamic programming, 14. sequencing problems, 15. network scheduling by pert/cpm, 16. inventory control, 17. replacement models, 18. queuing theory, 19. game theory, 20. simulation, 21. decision theory, 22. non-linear programming problem.
