in addition to gaining international attention, *man tiger* has also been embraced by critics and scholars of Indonesian literature at home. indeed, *cantik itu luka* and *man tiger* have been the subject of numerous academic and cultural journals, academic conferences, and film-screenings. as Lee Hanas explains, *lelaki harimau* was once the subject of major literary festivals, solo exhibitions, and several academic conferences. as i will demonstrate, a close reading of the author's comments about translation, as well as the published reviews and translations of his work, reveal major commonalities between Kurniawan's own statements and the reviews of his work. it is worth noting at the outset that the review, interview, and media coverage of Eka Kurniawan have been mediated and shaped by the different public, cultural, and political contexts surrounding his work. beyond his experiences in the British literary and cultural press, the reviews of his work in Indonesia have been informed by events in his native country and the historical legacies of two very different regimes, first the Dutch colonial regime and later the authoritarian New Order. as i have discussed elsewhere, Eka's work and his biography have been shaped by the post-colonial reinvention of Indonesia, a particular articulation of national history and identity. moreover, Eka's fame has also been built on the dramatic shift in literary tastes since the death of New Order dictator Suharto and the rise of globalization. most intriguingly, his prolific output of books and translations has arisen from his significant investments in the local entertainment industry and television drama scripts. this is

evident in his response to the questions of whether he works in a traditional (maung) or modern way:

indonesian publishers would also frequently explain that ekas work was simply too "hard to market" - particularly when it dealt with themes too dark, the supernatural, and the occult. for some publishers, these were too much of a risk. and yet, for a growing number of indonesians, ekas novels already represented a foreign product that could be treasured for its own sake - especially in the face of the ever-growing influence of television. the rise of mass entertainment, particularly in the 1980s and 1990s, included the proliferation of slick, cheaply produced, and often gaudy b-movies, a thriving local video-rental industry, and the growth of multiple tv channels and pop music channels. eka kurniawan would eventually struggle to find a publisher for his work. according to leopold sumarlin, one publisher whose rejection of ekas manuscript he later reproduced, his work was not too different from other "tiger-and-poison" novels, and was thus unsuitable for the western literature he had been reading. another was the publishing house gramedia, who wrote: i have read the first chapters, and i think this is a literary masterpiece, but it is not a good representation of what we usually publish. more importantly, we are concerned about causing a backlash of those who are influenced by the independence movement.. we prefer not to publish this book. however, in

addition to the british literary press, the indonesian media has also embraced eka kurniawan, and for good reason. man tiger is a much-lauded examination of the many richly interconnected threads of culture, history, and politics in the global south. it is driven by a central male protagonist, a bank clerk named yudhistira, who accompanies his rich sister as she makes a journey to attend an international literary festival, in an attempt to find the real story behind her bizarre case of amnesia. along the way, yudhistira experiences some deep, dark secrets from the region, as well as several harrowing moments of personal crisis. 5ec8ef588b
