As far as I can tell, this issue is fixed in RC3. Also I created and tested a backup of the fixed version and this one worked like a charm. UPDATE 1: I found the API version in the variable (of the ZServer). It's 1.7.5. Also on RC2 it's version 1.6.14 but still the same issue. UPDATE 2: As some posted the standalone version of the API works... UPDATE 3: Thanks for you're help, guys. I'm with the permanent solution of RC3. It's my fault for being a paranoid ass. A: It seems that API is 1.6.14 before the RC release. 1.6.15 after RC. An email to gamefy.com support was answered : Your version of API is 1.6.14 Thanks! Link to gamefy.com api changelog : Link to release notes : f988f36e3a
