Made from a light, woven polyester blend, the skirt will ensure the shirt stays dry, and you can easily wear it again, and again! I bought this skirt to pair with a cute top for a cute outfit, and it turned out to be my new favorite skirt! The skirt is very flowy and comfortable to wear and the length is really great, hits right at the bottom of my thigh. A versatile wardrobe essential! I wore it alone and with a white tee in a fun high-low look. It really makes me feel a bit like a younger version of Heidi Klum! This is a great skirt for weekend outings, to a professional business meeting, or in the city. A-line skirt is perfect for a sporty, casual outfit. Very comfortable. It does get a bit heavy in the middle. I think a light colored tee will be a good choice for the top. The skirt has a slight curve in the middle. It's

## What's New In SharpBITS.NET?

You have to register (in order to retrieve your BITS Account Credentials) and get a 'MANTISKEY' from the 'Bits.NET' tool first. The MANTISKEY is a unique key for your BITS Account that you have to use at the BITS Webserver to access up- and downloads. When you have logged in to your BITS Account, you will see the BITS homepage. To download BITS files you will have to click the 'BITS Download' button at the top right corner of the screen. You'll be asked for your BITS Account Key (MANTISKEY) and your Credentials (password). Please note that you can use the same key (MANTISKEY) for multiple BITS Accounts. If you use a BITS Account Key to download BITS files, you'll be asked if you want to save the file. If you select 'Yes', the download will start. The name of the file will be something like 'My NEW BITS FILE', the download speed will be 2-5 Mb/s depending on the connection speed. The file will be saved to your harddrive at the folder your BITS Account is in. You can then go to this folder to open the file. You'll be asked for your BITS Password (Password

you have set at the BITS Account) to decrypt the file. The BITS Password has to be the same one you use to log in at the BITS Webserver. You can also click 'Save to C:', which is equivalent to 'Save to harddrive', if you want to save the file somewhere else. Usage: In order to use this tool you have to use the following C# program. Simply copy and paste the program into a 'C#' text file and execute it. You'll be asked for your BITS Account Credentials first. Simply write down the BITS Account (aka MANTISKEY) and the Password you have set at your BITS Account. Also check the download speed, the file size and so on. As soon as the download is finished, you can exit the program. The file will be automatically encrypted and saved to the BITS Account folder. You can open the file by typing the BITS Password you have set at your BITS Account. Compiling: Just copy and paste this file to a 'C#' text file. Notes: Please be aware that this tool is still a work in progress. I have spent a lot of time doing it and I'm not satisfied yet. I know that there are many more things to change, but I can't do everything right now. I would really appreciate any help in order to make this tool better.
