A sweeping U.S. ban on asbestos imports is illegal under U.S. law, according to legal experts, because it doesn't give foreign producers an adequate alternative to U.S. asbestos. The problem: that asbestos, which causes health problems such as lung cancer, is one of the most important and basic raw materials that countries use to make everyday products like construction materials, toys and clothing. Exporters around the world have pushed back against the ban because they argue it will significantly increase prices for raw materials around the world and thus could affect their own businesses.
