enable search operations in Angular material data table? I have angular material data table  
components that is working fine and also I am using Angular Material's search bar that is working  
fine. But issue here, when I search for any value in search bar I am getting only first 10 records from  
my custom array. My data will be very huge data. So I want to search all of data when I perform  
search. This is my script, search search This is the TS code export class UserPageTS { userList:  
IUser[]; searchForm: FormGroup; constructor(private myService: MYService) {} ngOnInit() {  
this.user
