There's nothing wrong with sharpening or boosting the skin colors to make it look better. Extraordinary Elements is aimed at photo retouching and is actually a program for when you want to amp up the details in a photo without ruining the other image elements. We've been hearing rumors for over a year now about **Apple**'s new "iPhone X" (iPhone 10th anniversary, tenth anniversary), and now we have our first, and likely final, look at the presumed new device. At an event in Cupertino, California, **Apple** introduced new models of the iPhone 8 (8th anniversary) and the iPhone 8 Plus (iPhone X anniversary). Both models are nearly identical, other than the iPhone 8 Plus having a larger, nearly beveled display with an edge-to-edge superbike-like pebble-like screen and wireless charging capability. The iPhone 8 features a square-shaped liquid crystal display, while the 8 Plus model utilizes an OLED display with no bezelles for a crisper, brighter, and sharper screen. Using glass at both sides, the iPhone X is a decent improvement over the iPhone 8 and 8 Plus; the design feels more premium while still remaining practical and pocketable. The animations on iOS 11 are amazing. Switching from a LCD display to an OLED display is one of the most polarizing changes among tech enthusiasts. Since I myself have become a fan of OLED displays, it was exciting to see **Apple** debut its new display. It is worth it, but it does have its drawbacks. For one, I found it to be less accurate than its LCD counterpart. As a photographer, it is important that I have flawless color reproduction – which is where having a CRT display comes in handy. OLED displays are more susceptible to things like burn-in and backlight bleeding and it definitely can affect the display of an iPhone. One thing to keep in mind is that we should not expect Apple to release replacements for its displays for years. They simply are not available in high enough quantities to be sold at prices that would make them affordable substitutes to OEM (original equipment manufacturer) iPhone displays.
